Title Index

An Evaluation of Trace Element Release Associated with Acid Mine Drainage. P. J. Sullivan and J. L. Yelton, 181–186.

An In-Situ Integrated Suspended Sediment Stream Sampler (IS^3). R. J. Scrudato, G. Yogis, and G. Hocutt, 177–179.

Catastrophic Flood in the Polje of Cetinje in February 1986, a Typical Example of the Environmental Impact of Karst. B. F. Mijatovic, 117–122.

Cone-Penetrometer Exploration of Sinkholes Stratigraphy and Soil Properties. D. Bloomberg, S. B. Upchurch, M. L. Hayden, and R. C. Williams, 99–106.

Distribution and Formation of High-Fluorine Groundwater in China. R. Fuhong and J. Shuqin, 3–10.

Editorial—An Environment Worthy of Special Attention. Y. Daoxian, 1–2.

Effects of Discharge of Municipal Waste on Water Quality of the Lower Mississippi River. J. S. Hanor, 163–175.

Environmental and Engineering Effects of Sinkholes—the Processes Behind the Problems. B. F. Beck, 71–78.

Environmental and Engineering Problems of Karst Geology in China. Y. Doaxian, 79–88.

Environmental Geologic Investigation of Xintan Landslide. L. Guangrun, 11–14.

Environmental Geology in Loess Areas of China. S. Jianzhong, 49–62.

Evaluation of Data for Sinkhole-Development Risk Models. S. B. Upchurch and J. R. Littlefield, Jr., 135–140.

Features of Natural Environment and Occurrence of Groundwater in Cold Artesian Basins in Permaforst Areas, China. L. Feng-tong, 43–48.

Groundwater Resources in the North China Plain. F. Jin, 63–67.

Hydrogeological Aspects and Environmental Concerns of the New Valley Project, Western Desert, Egypt, with Special Emphasis on the Southern Area. F. A. Assaad, 141–161.

Karst Collapse in Cities and Mining Areas, China. J. Chen, 29–36.

Karst in Gypsum and its Environmental Impact on the Middle Ebro Basin, Spain. G. Benito and M. Gutierrez, 107–112.

Mechanism and Prevention of Karst Collapse near Mine Areas in China. X. Weiguo and Z. Guirong, 37–42.

Origin, Distribution, and Evolution of Salt-Fresh Groundwater in North Jiangsu Basin, China. Z. Hongchun, 15–22.

Planning and Design Considerations in Karst Terrain. J. A. Fischer, R. W. Greene, R. S. Ottoson, and T. C. Graham, 123–128.

Regional Levels of Indoor Radon in Virginia and Maryland. D. G. Mose and G. W. Mushrush, 197–201.

Sinkhole Management and Flooding in Jamaica. M. Molina and F. McDonald, 113–116.

The Engineering-Geological Evaluation of Sites Proposed for Development in the Dolomite Karst Regions of Southern Africa. P. Roux, 129–134.

The Indoor Radon Problem: Studies in the Albuquerque, New Mexico Area. D. G. Brookins, 187–196.

The Macungie Sinkhole, Lehigh Valley, Pennsylvania: Cause and Repair. P. H. Dougherty and M. Perlow, Jr., 89–98.

The Relationship of Kaschin-Beck and Keshan Diseases with Hydrogeochemistry. F. Hongci, 23–28.
